CITY OF CONSTANTA

Situated in the South-East of Romania, Constanta is one of the most important cities in the country as number of inhabitants, economic importance, and commercial development, the biggest port on the Black Sea and one of the major European ports, an important university center, as well as a touristic city with great history and the most modern, popular and populated tourist resort of the Romanian riviera – Mamaia Resort.

With a population of over 300,000 inhabitants, Constanta has a complex economical structure, with the following main branches: tourism, port activity and maritime transport, ship building and trade.

The aim of the City is the identification and use of land resources or areas that allow immediate urban operations or functional reconversion such as logistic parks, technology parks, leisure areas, theme parks, port-related areas, mixed functional areas by the reconversion of decommissioned industrial areas, development (rehabilitation and extension) of the main and secondary street network of local and zoning interest in relation to the regional and national infrastructure, respectively internationally by reference to the Pan-European corridors.

At the same time, Constanta is the only Romanian city served by all modern transport routes, namely road, rail, sea, river and air. Mihail Kogalniceanu International airport is located at about 25 km far from Constanta, and Tuzla utilitarian and leisure airport is the first Romanian private leisure airport.

This range of functions distributed in the territory places the City of Constanta among the most attractive areas of economic potential. The key topics of Constanta at Expo Real are smart city, port-related areas, tourism, logistic parks, technology parks, industrial parks, leisure areas, theme parks and economic potential.
